3.2.6 Calling Features

Calling Features are provided by the Company to enhance the utility of Local Exchange Service to the end user on a per line basis in conjunction with Local Exchange Service and are provided subject to availability. ~~Calling Feature definitions follow:~~

~~Call Forwarding~~ an arrangement whereby incoming calls may be transferred to another telephone number by signaling a prefix code and the telephone number of the service to which calls are to be transferred. Calls forwarded outside the local or extended area service calling area by this feature are subject to long distance message charges. These calls are also subject to transmission limitations.

~~Caller ID~~ will enable the customer to preview the calling number on incoming calls via a customer owned display device. Each customer will also have the ability to suppress or block their directory number from being sent on a per call basis. This service may provide long distance as well as local preview.

~~Caller ID Blocking~~ will allow the calling party to suppress their directory number so that the called party, with Caller ID service, does not receive their telephone number. The called party will receive a "private" message instead of the calling party's telephone number. Per Call Blocking can be activated by the calling party on a per call basis at no charge to the calling party.

~~Call Waiting~~ an arrangement whereby a customer who is using an exchange line arranged for call waiting is alerted, by means of a tone signal, when another caller is trying to reach that line. The customer, by flashing the switchhook, is able to have alternating conversations between parties.

3.2.6.1 Limitations

(A) ~~Calling Features are available only in those areas where hybrid coax plant is available to provide such services.~~

(B) The acceptance of long distance collect call messages is not restricted.
